The country of China is **located** on the continent of Asia. China's land area is nearly the same as that of the United States. The number of people in the United States as of 2019 is about 329,000,000, while the number of people in China is approximately 1,386,000,000. That's a big difference.

In China, you can find hot weather in the south and cold weather in the north. There is a large desert in the west, called the Gobi Desert, and three seas in the east. There are three major rivers in China. All over the country, you can find mountains and hills. The Himalaya Mountains, the world's tallest mountains, cross the southern part of China.

Even though it is a country with a different language and culture, the daily lives of Chinese people are more similar to us than they are different.
